

# ROBOT STRING DANCE

## CONCEPT:

This program show the prototype of a robot dance show. The concept behind the program is, that robots are made by humans, therefore the robots movement is controlled by the string, and from that the name: "Robot string dance".

Github:

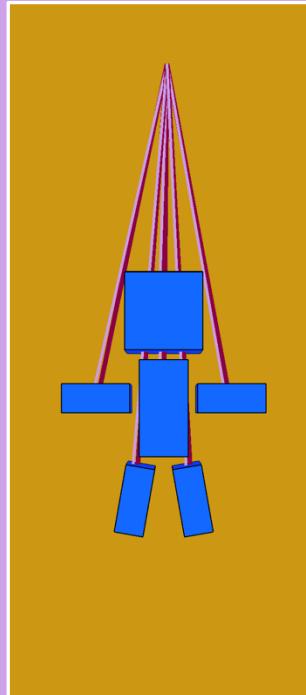

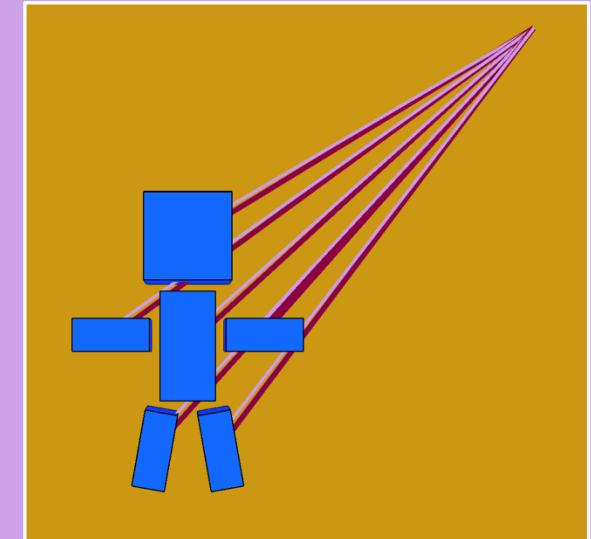

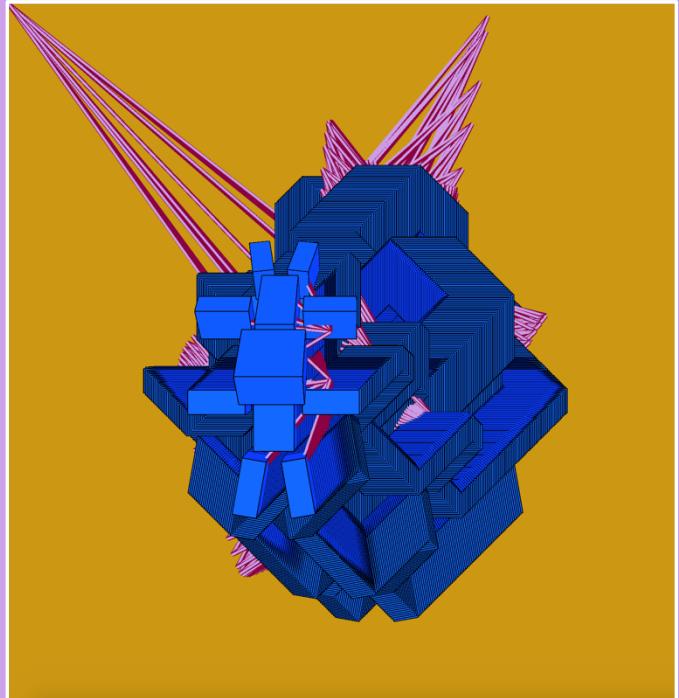

Program:

Made by  
Ester Marie  
Aagaard

## PROGRAM GOAL:

The goal for this program was to experiment with vectors, and different vector maths in p5 js. Such as the examples below:

```
this.move=createVector( mouseX , mouseY,0);  
  
this.direction = createVector(this.d*2,this.ud*2,0);  
  
this.pos.add(this.direction);
```

## CODE FUNCTIONALITY:

- Robot is created from a robotpart class, and consists of 5 different boxes.
- Movement of these boxes are controlled by the mouse position
- Strings/vectors are drawn from the center of each box, to the mouse position on the screen → strings symbolizes the control of the robot.
- Colors are picked so the movement of the robot generates a visual output.
